Keyscan Aurora access control software

Keyscan Aurora access control management software continues to be an innovative high-performance software platform loaded with features and robust integration options. It provides a single software solution that power Keyscan access control systems, regardless of size or complexity.

Keyscan Aurora Version 1.0.16 is now available and offers new key features including:

• Support for Keyscan mobile credential solutions

• Added support for E-Plex locks

• Support for the new E-Plex 7900 RFID wireless lock (coming soon)

• Integration and support for KONE SMART elevator systems

You'll find these among more than 110 total new features, enhancements and value-add options across all platforms including Aurora software, Aurora communications, Aurora agent, Software Development Kit (SDK), Aurora migration tool, and Aurora web client.

Keyscan Aurora - Version 1.0.16 is now available for download at Keyscan.ca.

Version 1.0.16 More features, more options, more integration.

To ensure your Keyscan access control system performs at peak efficiency, all Aurora users are encouraged to update your software regularly.

For a full list of new additions, enhancements and changes visit Keyscan.ca and click downloads.

With no performance-limiting governors or recurring fees, Keyscan Aurora is ideal for all Keyscan access control installations. Contact your Electronic Access and Data (EAD) sales representative or visit keyscan.ca to update your Keyscan Aurora software.
