

HUS-7A LATCHING HOLD-UP SWITCH

- Form C contact
- U-shaped key reset
- Status window indicator

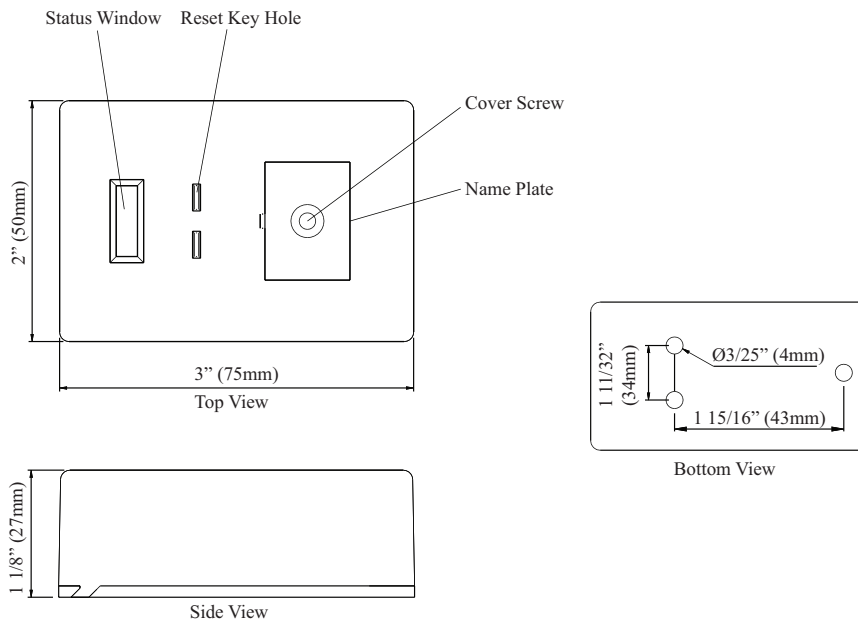

The HUS-7A is a single button, latching hold-up switch designed to provide a rapid signal to alarm systems. It is activated by pressing down the single button switch.

A status window indicates the condition of the switch: RED (alarmed), BLUE (armed).

A U-shaped key is supplied to reset the HUS-7A.

The hold-up switch sends a signal to a dedicated 24 hour hold-up circuit of a burglar control panel.
