

Phone & TV Distribution Module

C-0227

Channel Vision's C-0227 is a compact distribution module that distributes 4 Central Office phone lines to 7 locations and a CATV or antenna signal to 8 locations. The standard 110 punch down connectors allow for an easy and quick installation telephone service. The vertical orientation of the 8-way RF splitter allows easy connection of coax cables without exceeding maximum bend specifications. The C-0227 is ideal for installations which require telephone and TV service at several locations, but have very little space inside the structured wiring enclosure.

Features
Compact Design
Simple connections
DC power passing 8-way RF splitter
Telephone distribution to 7 locations
