

PREMIUM BASIC

AX-TN series is a compact designed photoelectric detector with IP65 high durability rating and accurate optical alignment performance. These features drastically reduces false alarms caused by severe outdoor environmental changes and it provides a wide range of applications.

FEATURES

IP65 structure with high sealing rubber packing

Rubber packing is used for all conceivable points where water or dust may penetrate, such as wiring holes, wire ports and the outer chassis. Prevention from dust, bugs and water delivers performance with higher reliability against false alarms and breakdowns.

IP65
Waterproof.
Protected against water jets from any direction
Dust-tight.
No ingress of dust.
International Protection Code.
It shows the degree of protection provided by enclosures.

Lightning protection

An improved Electro-Magnetic Interference surge absorber and high surge resistive relay has been installed to protect from lightning surges and maintain stable operation.

Anti-frost hood cover

A hood is installed to prevent frost forming on lower beams. It also makes the maintenance easy because the surface of cover is flat.

Easy angle adjustment

It allows the installer to finely adjust the beam easily.

High grade spherical lens

The high grade spherical lens creates more sharply defined and precise infrared beams compared to ordinary fresnel lenses.

99% beam blocking stability

Enables stable operation with as much as 99% loss of beam energy caused by heavy rain, dust storms, fog or snow.

A.G.C. (Automatic Gain Control) Circuit

A.G.C. circuit continually monitors for gradual changes in the signal's strength caused by changing weather conditions. It adjusts the sensitivity accordingly to maintain the proper signal level for the current environmental conditions.

Adjustable beam interruption period

The beam interruption time can be adjusted to fit any application. For example, when protecting a wall or fence, a longer interruption time will catch intruders.

SPECIFICATIONS

| Model | AX-70TN | AX-130TN | AX-200TN |
|--|---|---------------|---------------|
| Maximum detection range | 20m (70ft) | 40m (130ft) | 60m (200ft) |
| Maximum arrival distance | 200m (700ft) | 400m (1300ft) | 600m (2000ft) |
| Detection method | Infrared beam interruption detection | | |
| Interruption period | Selectable between 50, 100, 250, 500msec (four steps) | | |
| Power supply | 10.5 – 28V DC | | |
| Current consumption (Transmitter + Receiver) | 38mA max. | 41mA max. | 45mA max. |
| Alarm period | 2sec (±1) Nominal | | |
| Alarm output | N.C. 28V DC, 0.2A max. | | |
| Tamper switch | N.C.; open when cover is removed 28V DC, 0.2A max. | | |
| Operating temperature | -35°C – +60°C (-31°F – +140°F) | | |
| Environment humidity | 95% max. | | |
| Alignment angle | ± 90° Horizontal, ± 5° Vertical | | |
| Location of installation | Indoor / Outdoor : Wall / Pole Mounting | | |
| Weight (Transmitter + Receiver) | 650g (22.9oz) | | |

DIMENSIONS

OPTIONS

■ HU-3 : Heating Unit

Heating unit for severe low temperature conditions
24V DC/AC, 420mA max.

■ BC-3 : Back Cover

Back cover to conceal the pole.

■ PSC-3 : Pole Side Cover

Cover for installing
2 units to 1 pole.
