## Audio Amplifier

---

At the heart of every great audio system is a power amplifier. It's what brings the system to life. Vanguard Dynamics amplifiers are carefully designed and engineered to provide incredible acoustics while performing reliably. The Vanguard team has decades of experience in amplifier design and has put all of their experience into this outstanding line of amplifiers. Each part of the amplifier has been carefully considered and built for the best possible performance. That's why in many models where others would use digital power supplies we have chosen toroidal copper power supplies. That's also why while others manufacture in large scale facilities we instead choose a smaller manufacturing partner that only does amplifiers and has a decades long history of manufacturing some of the best amplifiers ever made. We back all of this confidence in our performance and reliability with a unique 5-year warranty.

### KEY FEATURES

- 2 x 50 W Per Channel Full Digital Amp with SMPS (Switching power supply - universal Voltage 100-240V)
- IR via rear input jack or remote controls: Source Select (2), On/Off, Volume, Tone and Mute.
- Auto On/Off
- TPro™ Digital Protection Circuit
- DigiPro™ Class D amplifier design for maximum sound quality and cooling
- Optical Input
- **5 YEAR PARTS & LABOR WARRANTY**
