JP-8Z **Distribution Adaptor**

DESCRIPTION:

The JP-8Z is a distribution adaptor for the JP Series. The adaptor is utilized when homerun wiring is desired. The JP-4MED master station and each JP-4HD sub master station will connect to this adaptor using CAT-5e/CAT-6 cable. The JP-8Z can surface mount using the mounting holes or with the W-DIN11 mounting rail. One or two PS-2420UL power supplies are used, depending on how many sub master stations are connected.

| Power Source: | 24V DC - use PS-2420UL (1 per 4 JP-4HD) |
|---------------|--|
| Wire Type: | CAT-5e / CAT-6 for stations 18AWG 2 conductor for power |
| Mounting: | Surface wall mount or DIN rail (W-DIN11) |
| Temperature: | 32-104°F (0-40°C) |
| Dimensions: | 4-5/16" H x 4-7/8" W x 2-7/16" D |
| Weight: | Approx. 0.46 lbs (210g) |
