HomeControl Flex™

HomeControl Flex adds essential interactive services to modern and legacy alarm panels without requiring expensive panel upgrades. Supporting a growing list of integrations, security dealers can upgrade users to home automation with Telguard's FlexHub Z-Wave Controller, voice control with Amazon Alexa and real-time video with Arlo HD cameras.

Home Automation

The Telguard FlexHub Z-Wave Controller helps security dealers increase RMR by enabling home automation. Adding a Z-Wave device to your install package will enable the end user to add more devices to their home like lights, locks and garage door openers. End users can access the portal and add devices as needed.

Telguard Support

Telguard offers all their Dealers and Installers industry renowned customer support, ensuring all installations and activations are quick and easy. As the thought leader in the industry, Telguard has proven their drive to embrace the integration of consumer lifestyle products with professionally installed security systems.
