DESCRIPTION:

The **SLE-ANTEXT** dual-band indoor / outdoor antenna provides omnidirectional coverage in cellular frequencies. When the minimum signal strength required by the Napco StarLink radio installation instructions cannot be met, the StarLink **SLE-ANTEXT** external antenna may be used to increase the signal strength. The **SLE-ANTEXT** is intended for use with StarLink SLE Series and StarLink SLE Fire Series UL Listed communicators.

The **SLE-ANTEXT** is designed to minimize loss and maximize gain (you can likely expect a gain of 3dB). Although we recommend using the **SLE-ANTEXT**, any similar cell phone external antenna may be used without violating the UL Listing of the SLE radio (always keep the length of the coax cable as short as possible to minimize signal loss).

Always mount the SLE-ANTEXT on a flat metal ground plane. The supplied mounting bracket is the minimum size that should be used; use of a larger

size is preferred. For outdoor installations, always follow NEC requirements for grounding.

IMPORTANT: DO NOT ALTER OR ADD COAXIAL CABLE! Except for mounting the antenna on a large metal ground plane, **DO NOT** place antenna within 4 feet of other large metal objects.
